

## **Editorial**

Dear Colleagues,

Indian Society of Engineering Geology had organised an International Conference on “Engineering Geology in New Millennium” (EGNM-2015) at Indian Institute of Technology, New Delhi between 27<sup>th</sup> -29<sup>th</sup> October 2015 to mark its Golden Jubilee. About 137 nos. full papers submitted for the Conference were published after peer review in the Special Edition of Journal of Engineering Geology (October 2015 Issue). The current volume of Journal of Engineering Geology contains the remaining full papers submitted for the above conference which could not be reviewed/ processed before release of the Special Edition.

Journal of Engineering Geology, the flagship publication of ISEG which was started in 1966 shall be completing fifty years in 2016. It has been planned to release a Special Golden Jubilee issue of the journal. I sincerely request all authors, researchers, technical experts and academicians who are working in the field of engineering geology and allied subjects to submit full length papers for this Special Issue.

This Volume XL No. 2 contains four very interesting papers on geotechnical studies related to hydro projects, mining and geo-hazards.

Lastly, I'll like to thanks former Editor and now Secretary in the New ISEG Council Shri Imran Sayeed for his consistent guidance and support to the journal.

With Regards

**(Rahul Khanna)**
