

Preface

The India National Group of IAEG or Indian Society of Engineering Geology (ISEG) celebrated its Golden Jubilee in October 2015 in a befitting manner by organizing International Conference on “Engineering Geology in New Millennium” (EGNM 2015) at IIT, New Delhi between 27-29 October 2015. The conference which was sponsored by IAEG and co-organized by GSI, MECL, IIT and CBIP was a grand success with the submission of over 140 papers. The society brought out Special Publication (Oct. 2015) of Journal of Engineering Geology encompassing peer reviewed 137 papers submitted for the conference. The other papers which could not be processed before the special issue went press are being published now in this Supplementary Issue (Dec. 2015) Vol. 40 No. 2 of Journal of Engineering Geology.

I am once again thankful to all the authors for sparing their valuable time and making contributions for the journal. We will continue to solicit your technical contributions professional as well as research findings for our regular Bi Annual Journal of engineering Geology published in July and December every year. This journal the only one of its kind in India will be celebrating its Golden Jubilee having commenced its journey in 1966 one year after formation of ISEG in 1965.

Kudos and Cheers for J of EG. In 2016 Golden Jubilee Special Issue has been planned for which your support and technical papers are required. I am highly thankful to my erstwhile Joint Editor Shri Rahul Khanna for his devoted and sincere hard work. Profuse thanks are due to our respected members of the Editorial Committee for EGNM for their valuable evaluation of papers.

I am sure Shri Rahul Khanna as new Editor of the Society will bring in more success for the journal.

Thanks and Regards

(Imran Sayeed)
